

## Testimonials

"Thanks for a great product! We purchased two Ritchie dual watering fountains for sheep...as part of a conservation program. We easily installed the fountains ourselves. They work great and are easy to keep clean. Our sheep have a fresh and cool source of water at all times! Sidney, Greeneville, Tennessee."

"When the air temperature is -41 degrees and your waterer is wide open, you know you have a good product. The waterer worked just like it was supposed to. You can't say that about many products these days." Tony, Blair Wisconsin.

"We have used Ritchie products for 41 years. Their durability and maintenance-free design are top in the industry. We rely on the excellent knowledge and service our distributor provides. Ritchie continues to be committed to the livestock industry and our needs." Bill Couser, Iowa

"Choosing Ritchie waterers was an easy decision. I have known operations who have used them for 30-40 years. It's a real testament to their quality and longevity. They have been easy to use, easy to maintain." Brian Finnestad, Werner Angus, Cordova, Illinois.

"We're real happy with the Ritchie 150S. They're easier to clean than previous waterers. We can keep fresh clean water at all times. Since we've switched to the Ritchie and can keep them clean, we're getting a higher rate of gain on our kids. If she drinks more, she's going to milk more. We wanted a waterer that would keep kids and lambs from standing on it. It's tall enough that I'm not worried about the newborn kids getting into it and drowning. But, it's short enough for young kids to reach in there and have access to water." Eric Finch, Iowa.

"I chose Ritchie for the quality, craftsmanship and durable construction. The waterers can't hurt my horses and my horses can't hurt them. I have installed Ritchie fountains throughout my facility because I know I can count on them day in and day out." Clinton Anderson.

"We can speak of the longevity of Ritchie fountains. Some of our Ritchie fountains are 25 years old and they just keep right on working. The few times we've needed to change out parts, they've been easy to replace. They're pretty much fault free." Chris and Sharee Sankey, Kansas

"I use Ritchie because of their reliability and durability. When it's time to replace a fountain, we replace it with another Ritchie. We especially like the Ritchie valve system. Where other fountains tend to plug up, Ritchie valve don't." David Martin, Missouri.
